

# Customize Your Terminal

## Learning Outcomes Addressed

2. Use the terminal or command prompt to manage files
3. Customize your terminal environment

Were you able to access files from the terminal window? Did you customize their look and feel? Upload a screenshot of your terminal window and answer the following questions:

- 1) What file did you access?
- 2) How did you customize your terminal window?

Did you encounter any challenges? How did you overcome them?

For more resources on how to customize your environment in Mac or Windows, you can review the [Troubleshooting Guide](#).

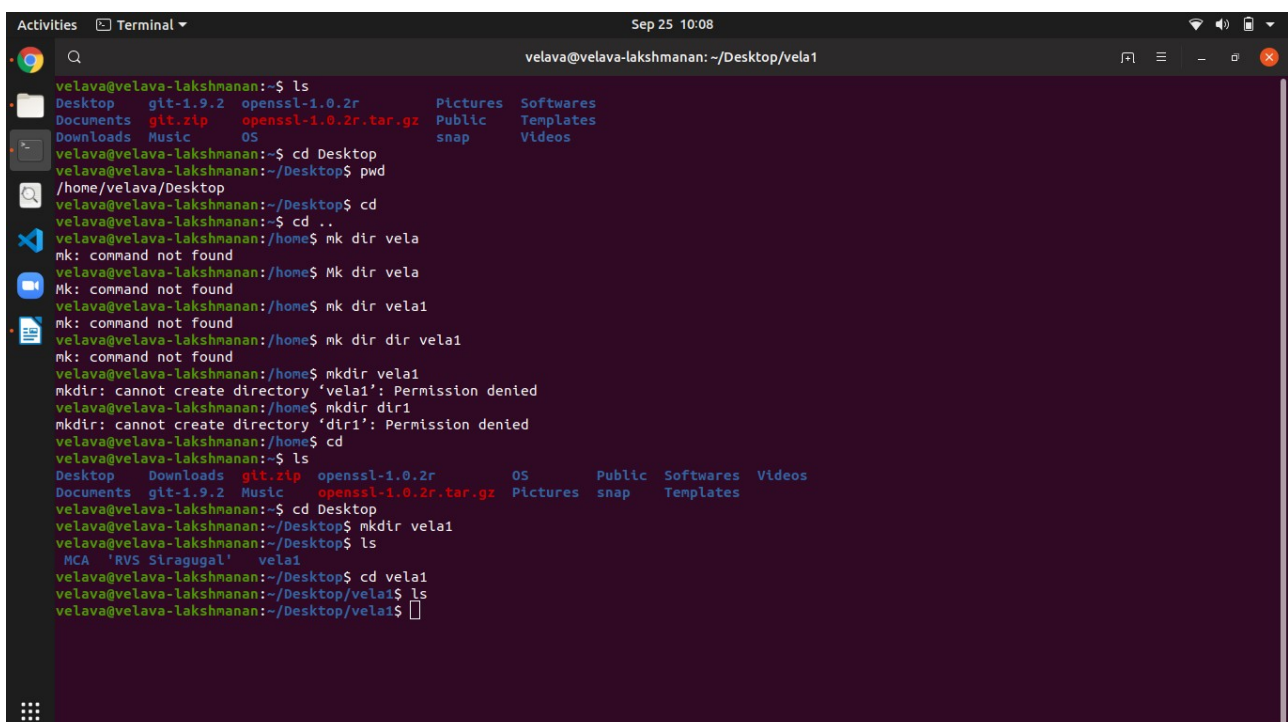

## Submission Instructions:

- Word count: 50-100
- You are encouraged to reply to your fellow learners to continue the conversation.

Answer:-

1)I worked with terminal using, present working directory using **pwd**, changed the directory to Desktop using **cd** command and created a folder named **vela1** ,cd .. to exit from a directory and **ls** to check the list in system.

2)I tried new codes and how it works.
